Teacher Requirements — Final SRS Version (ATAUR)

1. Functional Requirements

ID	Functional Requirement	User Story
FR-01	The system shall allow teachers to log in using a valid email address and password, reject invalid credentials, and log out securely.	US-T1
FR-02	The system shall display a teacher dashboard containing assigned courses, today's classes, pending tasks, and recent notifications.	US-T1
FR-03	The system shall display the courses and sections assigned to the teacher, including class schedules and enrolled students.	US-T2
FR-04	The system shall prevent teachers from accessing courses or sections that are not assigned to them.	US-T2
FR-05	The system shall allow teachers to mark students as Present, Absent, or Late and submit attendance for the entire class at once.	US-T3
FR-06	The system shall save attendance records with the attendance date, class section, class session, student, and attendance status, and prevent duplicate records for the same student and session.	US-T3

FR-07	The system shall allow teachers to correct submitted attendance when permitted and record the change history, including the previous status, updated status, date, and editor.	US-T3
FR-08	The system shall allow teachers to view attendance records by student, section, and date and filter records by a selected date range.	US-T4
FR-09	The system shall identify students with repeated absences or late arrivals based on the available attendance records.	US-T4
FR-10	The system shall allow teachers to create and publish announcements for their assigned sections, with optional file attachments.	US-T5
FR-11	The system shall restrict announcements to students enrolled in the selected section and allow teachers to edit or remove their own announcements when permitted.	US-T5
FR-12	The system shall notify relevant students when an announcement or assignment is published.	US-T6
FR-13	The system shall send reminders for upcoming deadlines and display notification delivery status when delivery tracking is supported.	US-T6
FR-14	The system shall allow teachers to create assignments containing a title, instructions, total marks, due date, and optional file attachments.	US-T7
FR-15	The system shall allow teachers to save assignments as drafts and ensure that only published assignments are visible to students.	US-T7

FR-16	The system shall allow teachers to view submitted, late, and missing assignment submissions for their assigned sections.	US-T8
FR-17	The system shall allow teachers to open or download submitted assignment files and automatically record submission timestamps.	US-T8
FR-18	The system shall allow teachers to permit late submissions or resubmissions when necessary and authorized.	US-T8
FR-19	The system shall allow teachers to enter quiz, midterm, and final examination marks for students in their assigned sections and store marks separately for each assessment.	US-T9
FR-20	The system shall validate entered marks against the applicable total marks and allow teachers to review and correct marks before submission.	US-T9
FR-21	The system shall allow authorized teachers to edit submitted results when permitted and record the previous mark, updated mark, timestamp, and editor.	US-T10
FR-22	The system shall require approval for corrections to finalized results when required by the university's process and notify affected students when published results change.	US-T10
FR-23	The system shall calculate final grades according to the approved grading policy and allow teachers to review marks and grades before submission.	US-T11
FR-24	The system shall display grade statuses, including Draft, Submitted, Approved, and Published, according to the university's process, and prevent	US-T11

	teachers from approving their own grades when approval is assigned to another authority.	
FR-25	The system shall allow teachers to provide individual feedback to students and link the feedback to the relevant assignment or assessment.	US-T12
FR-26	The system shall make feedback available to the intended student when released and prevent other students from viewing that private feedback.	US-T12
FR-27	The system shall allow teachers to submit reports about academic, attendance, or behavioral issues, including the student's details and a description of the issue, to the designated authority.	US-T13
FR-28	The system shall restrict issue reports to authorized users and allow teachers to check report status when status tracking is supported.	US-T13
FR-29	The system shall display upcoming classes, relevant deadlines, pending submissions, and results awaiting action on the teacher dashboard.	US-T14
FR-30	The system shall allow teachers to open tasks directly from the dashboard and return to the dashboard after completing a task.	US-T14

2. Non-Functional Requirements

These describe the system's quality, security, and operational constraints rather than individual teacher features.

ID	Category	Non-Functional Requirement
NFR-01	Performance	The system shall respond to dashboard loads and common actions, such as opening a course or viewing attendance, within 3 seconds under the defined normal workload.
NFR-02	Performance	The system shall save attendance and marks for a typical section within 3 seconds under the defined test workload.
NFR-03	Security	The system shall require authentication before granting access to protected features and store passwords using a recognized secure password-hashing algorithm.
NFR-04	Security	The system shall enforce role-based and section-based access control and invalidate the user's session upon logout.
NFR-05	Security	The system shall use HTTPS with secure TLS for data transmitted between clients and the server in deployed environments.
NFR-06	Data Integrity	The system shall validate attendance, marks, grades, and submissions before saving and maintain consistent database records when operations succeed or fail.
NFR-07	Reliability	The system shall confirm successful save operations, display clear error messages when operations fail, and perform database backups at the configured frequency.

NFR-08	Usability	The system shall provide a consistent interface with clearly labelled actions and appropriate loading, success, and error states.
NFR-09	Compatibility	The application shall support the agreed versions of Chrome, Firefox, Edge, and Safari and provide a responsive interface for desktop, tablet, and mobile screens.
NFR-10	Auditability	The system shall maintain an audit history of attendance and result changes, including the affected record, user, change details, and timestamp, with access restricted to authorized users.
NFR-11	Privacy	The system shall restrict access to student information, private feedback, and issue reports according to user permissions and prevent disclosure to unauthorized recipients.
NFR-12	Maintainability	The system shall use a modular architecture, support testing of critical functionality, and log application errors without exposing sensitive information.
NFR-13	Time Accuracy	The system shall record timestamps consistently using the institution's configured time zone and calculate submission deadlines and late-submission status consistently.
